

NEW PRODUCT

Express Radiant sells 4" lineset cover in ivory.

Featuring a flatter profile, this product can accommodate three sets of refrigerant lines for protection against the elements. Product is paintable and is also suitable for indoor use.

**SOLD IN
PACKS
OF:** **6**

1. LONG CHANNEL 8' | Part #: SA4-LSC8

Description: Main straight section that encloses the lineset. Comes in 8' lengths in packs of 6.

2. UNION COUPLING | Part #: SA4-UC

Description: Connects straight sections of your system.

3. WALL PENETRATION | Part #: SA4-WP

Description: Completes your wall transition from outside to inside (or inside to outside!).

4. FLAT BEND 90 | Part #: SA4-FB90

Description: Routes your lineset left or right with a 90-degree horizontal turn.

5. FLAT BEND 45 | Part #: SA4-FB45

Description: For less-sharp transitions than 90 degrees, this routes your lineset left or right at a 45 degree horizontal angle.

6. SOFFIT FITTING | Part #: SA4-SF

Description: Transition piece used to exit from a ceiling or soffit to the exterior.

7. T-JOINT | Part #: SA4-TJ

Description: A three-way connection piece that can be used to split or combine your refrigerant line.

8. INSIDE ELBOW | Part #: SA4-IE90

Description: Route your line around an interior angle of a building or wall.

9. OUTSIDE ELBOW | Part #: SA4-OE90

Description: Route your line around an exterior angle of a building or wall.

10. DUCT END | Part #: SA4-DE

Description: Finishing component to end your lineset cover run.
